XICHENG

Professional design and production of PP/PVC waste gas treatment equipment
Production and sales of all types of PP pipe / ventilation accessories

深圳市熙诚塑胶有限公司

Shenzhen Xicheng Plastic Co., Ltd.

Company profile

Shenzhen city Xi Cheng Plastic Co., Ltd. Located in Baoan District, Shenzhen, The company mainly produces waste gas treatment equipment, ventilation equipment, exhaust tower, activated carbon tower, washing tower, PP board, PP pipe, PP wind valve, PP elbow, and other ventilation accessories. Our company can be customized according to the drawings or requirements of the processing. Product quality assurance, price concessions.

Pp Product use convenient, good effect, Endure acid and alkali corrosion, anti ultraviolet, not conductive, Strong flexibility, easy to install. Waste gas treatment equipment products are widely used in electronic industry, chemical industry, pharmaceutical industry, textile industry, rubber and plastic industry, automobile industry, ceramic industry and so on. The company has advanced laser engraving machine, automatic welding machine, automatic bending machine, injection molding machines and other automation equipment. The company has large production scale, process specification, high efficiency, can save a lot of production cost and production time for the customer, shorten the time limit for a project。

The company has a certificate of international quality certification. Products are sold to the global market, won the love of old and new customers. Companies to "quality – oriented, scientific management, pay attention to reputation" for the purpose.With the market demand as the guide, has independently developed hundreds of new products to meet the needs of different industries. Our company is committed to create a higher value for customers, welcome to the company to visit the exchange of guidance.

PP/PPS Washing tower

PP Swirl tower vane

Transparent window

PP Washing tower : Widely used in industrial acid and alkali and other waste gas purification, is currently the most practical one of the acid and alkali waste gas treatment equipment. Washing tower is mainly divided into two kinds: packing tower and swirl tower.

PP/PPS Washing tower

PP horizontal Washing tower

PP/PPS square Washing tower

Our company make washing tower has a complete set of specifications, the tower structure is reasonable, beautiful appearance, the effect is good. Tower body PP material has anti ultraviolet function, can increase the service life.

Mailbox: 18566636032@163.com Web: http://shenzhenxicheng.en.alibaba.com/

Washing tower accessories

Window flange: with short, easy to use, flange, high strength, good sealing, size 500*600*15T

Transparent window: UV protection. High transparency.

Injection molding spray pipe: smooth, small resistance, non clogging, spiral connection, easy to install, easy to maintain.

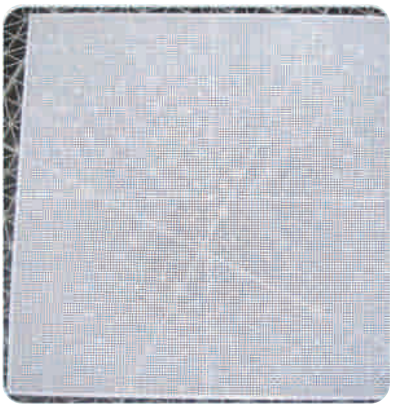

PP nozzle: spiral connection, easy to install, easy to maintain.

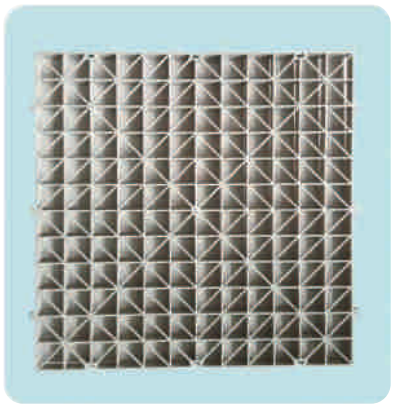

PP high efficiency nozzle: conical spray, is ordinary 2–3 times.

PP packing: Delaware Ruihuan
(50 70)
Hacketten(50)
Bauer ring(50 25)

PP Filter plate: pupil filter plate size 750*750*6T, hole diameter is 3.6mm

PP grid plate: transparent, easy to apply, low cost
(500*500*25t)

Float valve: 20/ 25/ 32

Activated carbon tower

PP activated carbon tower adsorption tower：Using activated carbon adsorption function, so that the exhaust gas adsorption on solid surfaces, thereby purifying the gas. Is energy saving and environmental protection equipment, mainly processing benzene, ketones, alcohols, ethers, alkanes organic waste gas.Mainly used in the pharmaceutical industry, electronic industry, chemical industry, textile industry, rubber and plastic industry, automobile industry, ceramic industry, deodorant and other harmful gases.

internal structure
PP/PPS activated carbon tower

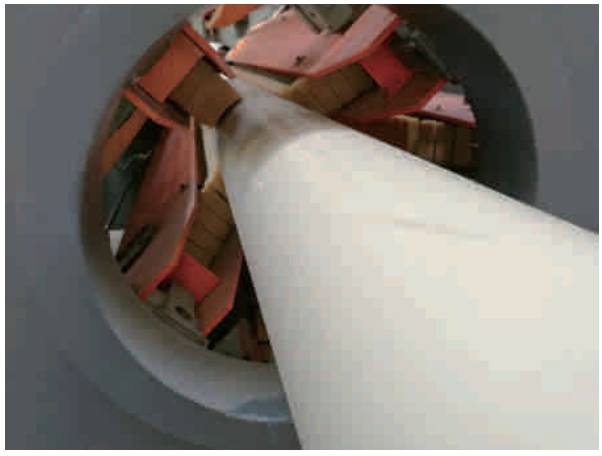

Our long–term research on the structure of activated carbon tower optimization, and now the product structure is more reasonable, easy to use, price concessions. We specifically designed for the active carbon tower PP perforated plate, the specification is 750*750*6mm.

PP forming air duct: the company has advanced pipe injection molding equipment and many years of production experience, the production of the pipe inside and outside the wall smooth, high strength, acid and alkali corrosion resistance, long life, easy installation, widely used in corrosive gas emissionsOur company now produces all types of air duct specifications are as follows:∅20*3T、∅25*3T、∅32*3.2T、∅40*4T、∅50*4.5T、∅63*5T、∅75*5T、∅90*5T、∅110*3T、∅160*3.3T、∅200*3.5T、∅250*4T、∅315*4.5T、∅335*5T、∅400*5.5T、∅500*6T。

Duct

PP Processing air pipe: according to customer requirements and drawings, processing and production of different sizes of the wind pipe.

PP ring (direct): injection molding, beautiful appearance, standard size, complete specifications; convenient and affordable. Specifications are as follows:Up to 110、 160、 200 250、 315、 335、 400, other specifications can be customized.

PP flange: Injection molding, high strength, size standards, complete specifications; easy to use, there areThe utility model improves the efficiency of the air pipe, and is divided into a connecting flange and a reinforcing flange according to the function. 110、 160、 200 250、 315、 355、 400、 450、 480、 480、 500、 550、 600、 650、 700、 800、 900、 1000, other specifications can be customized.

PP rings: This product by our own research and development production, one–time injection molding, high strength, beautiful appearance and generous; used to lift the wind pipe, the use of simple and convenient, specifications: 110、 160、 200, can also be customized specifications

Mailbox: 18566636032@163.com Web: http://shenzhenxicheng.en.alibaba.com/

Electric air valve

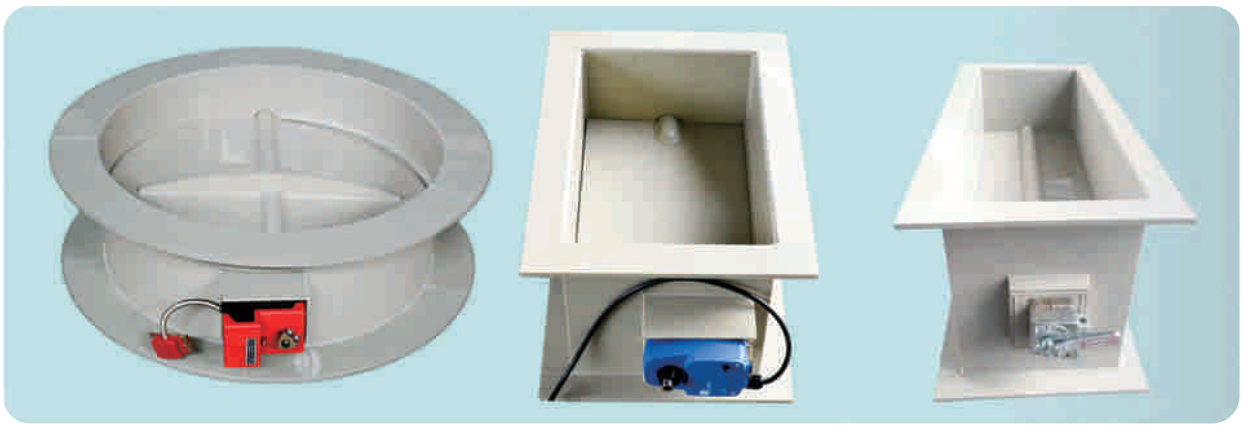

PP manual air valve：Injection molding, good sealing performance, small resistance, beautiful appearance, Specifications have：DN63,DN75,DN90,DN110,DN160,DN200,DN250,DN315.

PVC electric air valve

PP pneumatic valve

PP electric air valve

PP square electric air valve

PP fire

Shenzhen Xicheng Plastic Co.,Ltd.
Add:Shenzhen City,Baoan District Whampoa manhole town industrial zone second

Constant air volume valve

Constant air volume valve： Using ABS and 316 stainless steel, the internal use of the spherical shell on the valve body with air to control. The flange connection and ring connection.Control air volume range: 100–2300m3/h. wind pressure range is: 150–750pa。

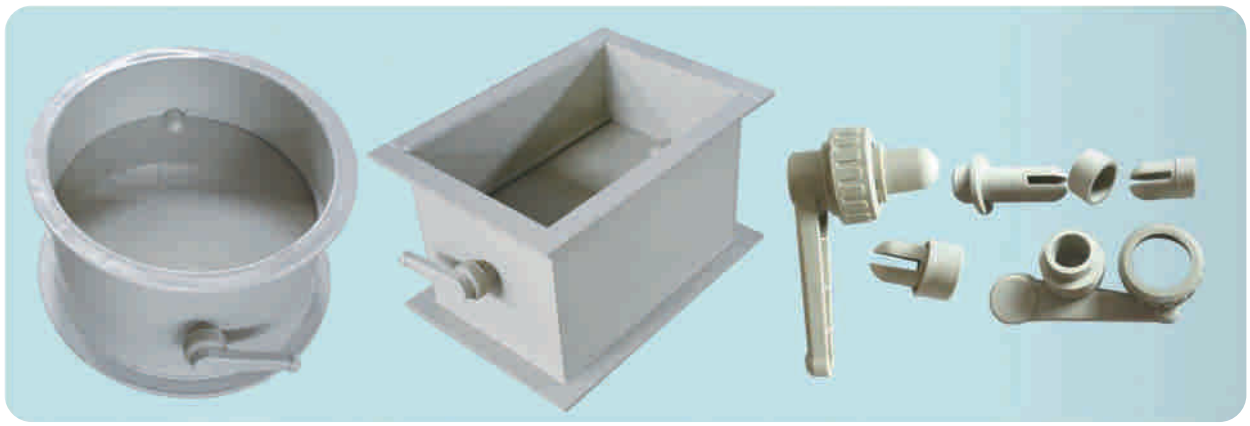

Mailbox: 18566636032@163.com Web: http://shenzhenxicheng.en.alibaba.com/

https://shenzhenxicheng.en.alibaba.com

PP manual air valve: Injection molding, good sealing performance, small resistance, beautiful appearance, Specifications have: DN63,DN75,DN90,DN110,DN160,DN200, DN250,DN315.

PP handle molding air valve: Our company independent research and development of wind valve accessories,Beautiful appearance,easy to use,Can be customized large size manual air valve,according to the size of the processing.

Processing air valve

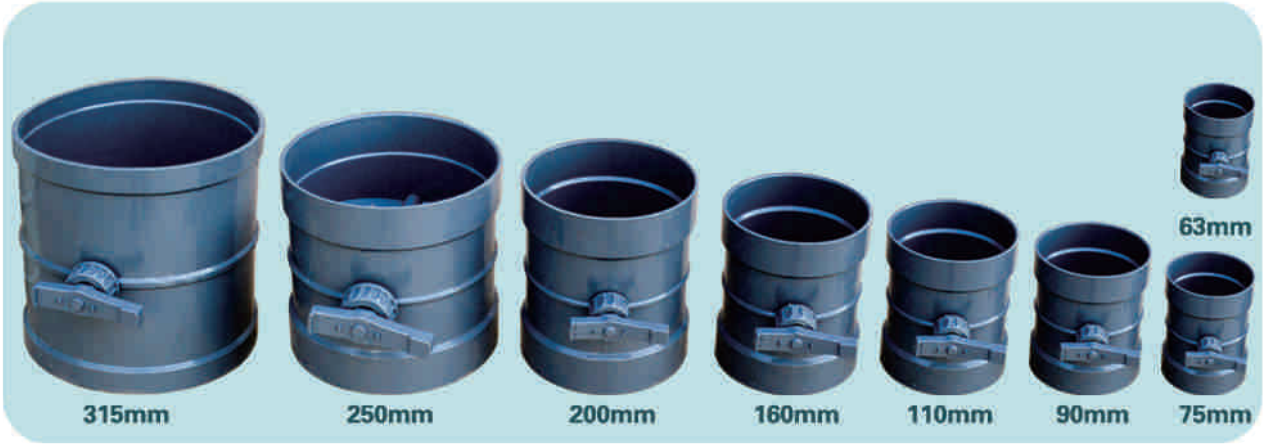

PP three leaf round air valve | PP check valve | PP cutting plate

PP white air valve

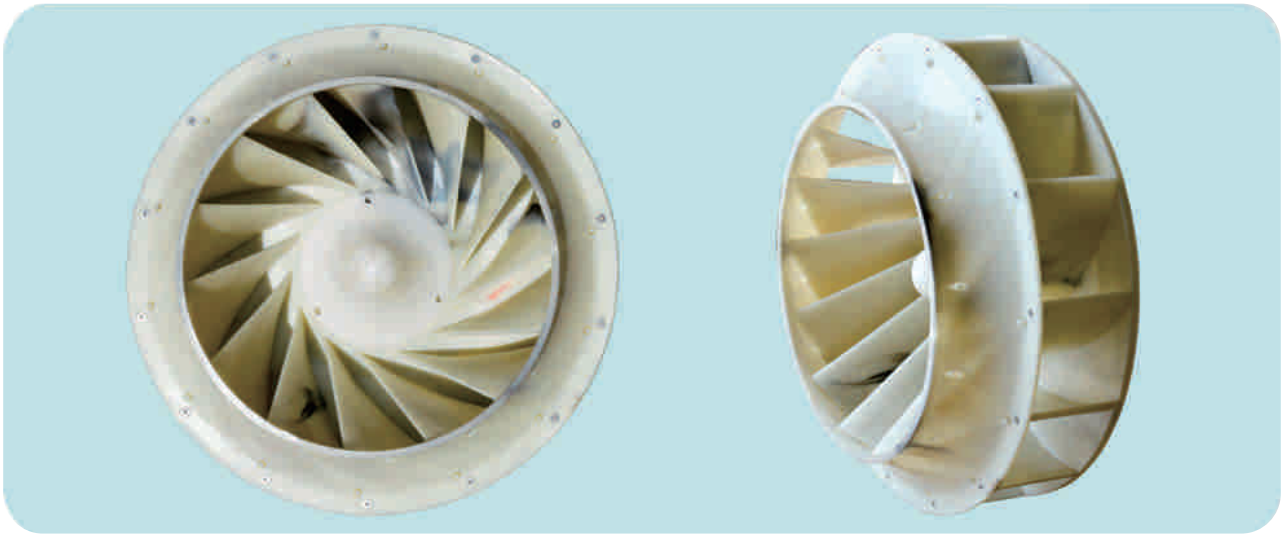

Flame retardant air valve

Pvc air valve: Two PVC air valve of our company undertake socket, convenient connection, integrated molding, injection molding of high strength, good sealing, smooth, small resistance and can be customized. The electric air valve, the corrosion prevention actuator. Stable performance.

Mailbox: 18566636032@163.com Web: http://shenzhenxicheng.en.alibaba.com/

Fan impeller

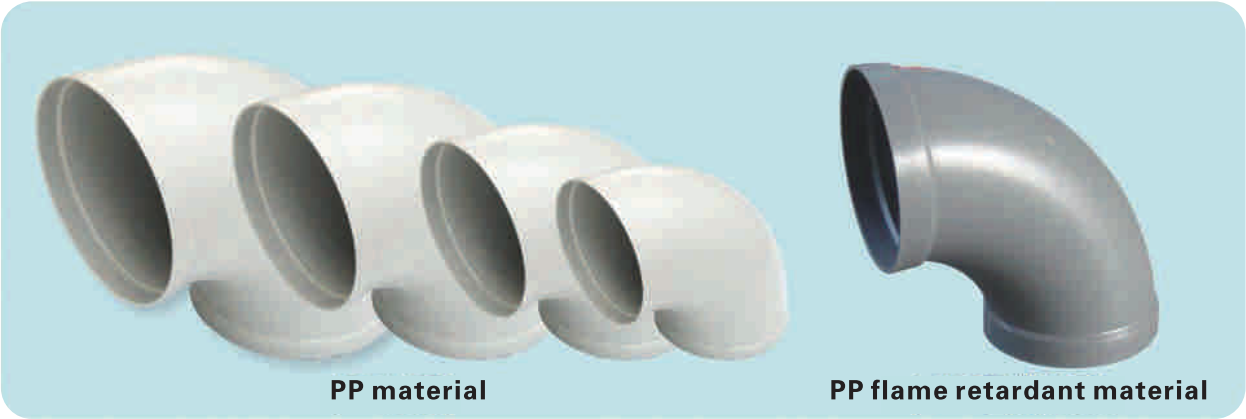

Fan impeller: high efficiency fan impeller is developed by the company is using the PA66+15GF material injection molding.
The cover material has stiffness, hardness, high toughness characteristics.It also shows its superiority in aging resistance, vibration resistance and corrosion resistance. It is often used in high strength mechanical parts, such as automobile, fan and so on
The central axis of the impeller is designed with cone shape, which can effectively avoid the rust caused by the long time use of the motor and the impeller

The elbow made by two piece welded with arc small wind resistance, high strength, light weight, connectivity, reliability, long service life, convenient transportation and so on.The main specifications are DN355 DN400 DN450 DN500, at the beginning of the middle line elbow design, along the midline incision can get 2 45 degree elbow! All have a large number of specificationsProduction, cheap, large quantity favorably, welcome to negotiate orders

Elbow

PP material

PP flame retardant material

PP injection molding elbow: according to the ventilation standard production, injection molding, reasonable structure, beautiful appearance and have the corrosion resistance, long service life, high strength, simple welding。There are 90 degrees and 45 degrees： DN110,DN160,DN200,DN250,DN315.

PP square elbow

PP elbow

PP elbow

PP S type elbow

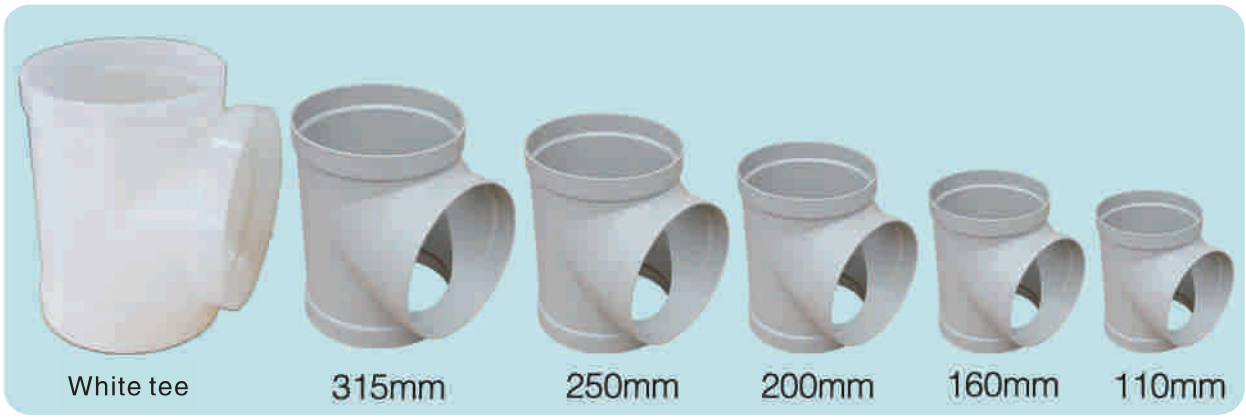

Can be customized according to the drawings and requirements of different specifications of Circular Bend, square elbow, S type of elbow. CNC machining, manual welding, reasonable structure, beautiful appearance

Mailbox: 18566636032@163.com Web: http://shenzhenxicheng.en.alibaba.com/

https://shenzhenxicheng.en.alibaba.com

PP diameter: injection molding, complete specifications, exquisite appearance, convenient use, existing specifications：∅200–∅110。。。Can be customized according to the requirements

PP three links: Our company independent research and development, injection molding, complete specifications, exquisite appearance, easy to use, Can be customized according to the requirements.

Trough

PP trough

PP trough

PP trough

PP lash trough

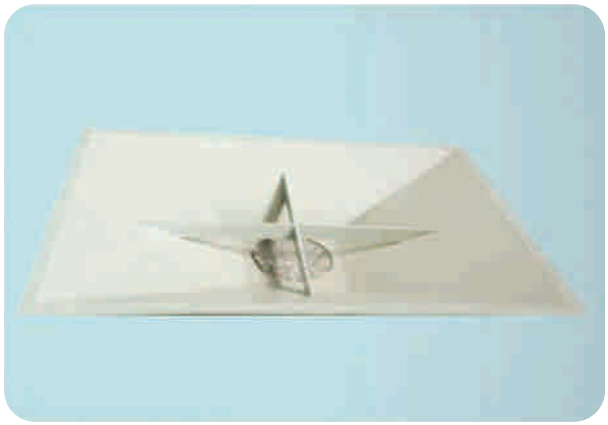

PP trough：Electroplating trough, oxidation tank, tank cleaning, pharmaceutical Caozi materials used is PP, corrosion resistance, high temperature resistance, reasonable design, long service time.

PP standard plate

PPGE board – anti ultraviolet

PP whiteboard

PVC transparent plate

Flame retardant board

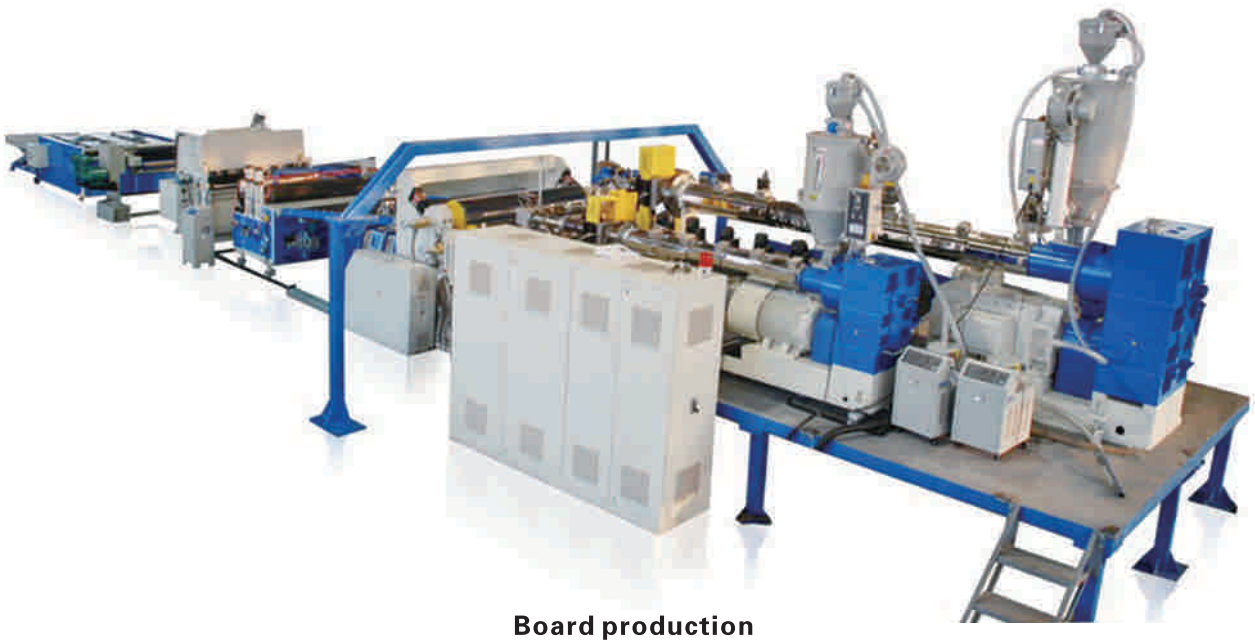

PP m gray sheet: resin added by grey sheet extrusion, various functional additives of light pressure, cooling, plastic sheet cutting process and made. Now the company has own production plate (PP plate) plate and consignment (PPGE qui PPGE a PP board, board, whiteboard, PVC transparent board)

Advantages: the surface is smooth, not easy to aging, good corrosion resistance, price concessions, is the standard of environmental protection materials.

Uses: widely used in waste gas treatment, chemical industry, machinery manufacturing industry, electronic industry, medical industry, water treatment and other fields. We have a standard size 1500*3000mm. thickness of 3mm–30mm, can be customized according to the requirements.

Board production

https://shenzhenxicheng.en.alibaba.com

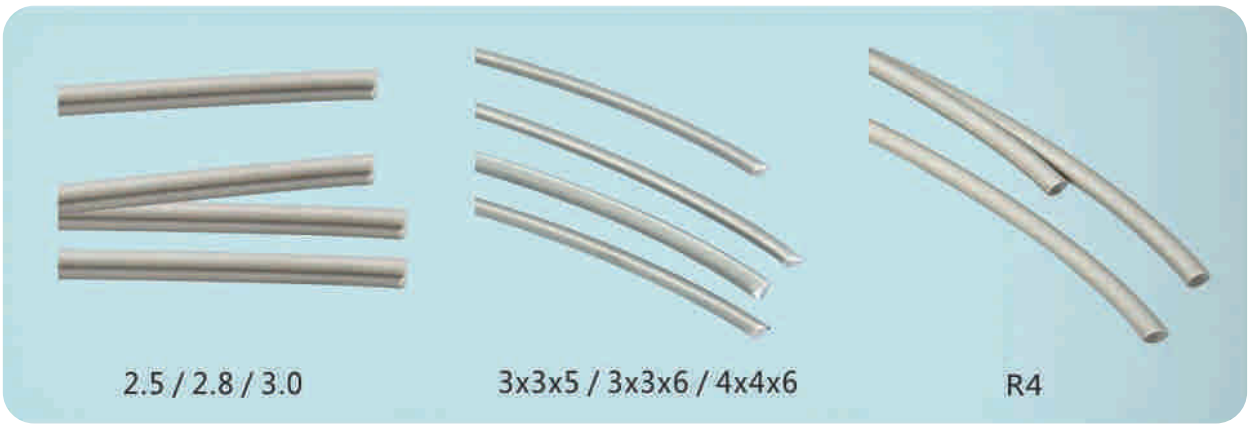

Board production

Our company adopts advanced sheet extrusion equipment, the production of PP, PPS, PVC, etc. The plate thickness is in the range of 3–30mm, width of plate size is 500–2000mm, the length is not limited. The product has smooth surface, small size error, good corrosion resistance, good insulation.
